Experience the integration of a VIVARI® washbasin. The unique look and feel of a solid surface washbasin guarantees many years of satisfaction. Benefit from the easy cleaning and care. Enjoy the feeling of uniqueness.

Every washbasin is handmade. With our wide range of colours, we will meet your design requirements.

Image: VDA 58.370 Integrated washbasin, CUBE bath tub

No day is like any other. Mood, opinions, ideas, everything is constantly changing and this is also true of people's living space. Working together with you, we realise creative room concepts. As a manufacturer and partner, we offer you products and solutions for many areas of use.

We work with different solid surface materials which, in combination with other materials like tiles, wood, concrete, steel or glass allow fascinating forms and surfaces; solid surface materials are robust, non-porous, and easy to maintain.

# Shower trays made to measure

In the beginning, there was the goal: to create an ambience as multifaceted as the spirit of our times.

The result: a product line for the bathroom that you can freely design according to your own desires and imagination. Dimensions are blown open and freedom made visible. With AQUAMASTER range, creativity knows no limits.

Experience maximum freedom of movement with our XXL shower trays. Where other materials reach their limit, we can produce your customized solution. Seamless integrated components like benches or storage space complete our solution. This opens the way for unlimited shower delight.

The 12 mm thick solid surface material provides a uniform surface and is certified according to the international standard DIN ISO 846. Neither bacteria nor mildew can take root. Aesthetics and functionality complement one another seamlessly with AQUAMASTER.

# AQUAMASTER XERO

## Flexibility in any format

XERO gives you the option of implementing a variety of customized system solutions in addition to standard shapes – without having to restrict your planning freedom. Use the numerous options to realise shower trays up to 3000 mm length and 1200 mm width.

### System solutions

- Customization up to 3000 mm length and 1200 mm width
- Variety of colours
- Standard shapes (Square, rectangle, quadrant)
- Easily accessible
- Low installation depth (submounted or flushmounted)
- Easy to clean and maintain
- Circumferential vario joint sealing band (Option)
- Central or offset drain
- Various drain options
- Wall connection as coved backsplash or straight (Option)
- Integrated groove for glass partition wall (Option)
- Anti-slip coating for public areas is possible (Option)
- Drain capacity  $\geq 0,64$  l/s (Depending on the selected drain)

Colour
